PREFACE TO THE READER.

It is the Custome of well-Reformed Cities in *GERMANIE* and *ITALIE*, (Courteous Reader,) that everie yeare the Colledge of Medicine visite all Apothecarie Shops, and examine their Droggs, Simple, and Composeds; as destilled Waters, Syropes, Electuaries, Pillons, &c. and what-soever is fuisted, corrupted, falsified, or any-ways sophisticate, they throw them out: and all dry Herbs, reserved two yeares (altho perchance fresh) they cause burne: and after there bee new and recent Simples gathered and bought, they over-see the composing of such thinges as should stand over yeare. Thus the Shop being replenished of new, they cause print the Table and Taxe of all those Medicaments, according to the plentie of the yeare, and as Forraigne Simples are bought, cheaper, or dearer, from *INDIAN* and *EASTERNE* Traders: so they renew ordinarily the Taxt everie yeare as the Almanacke, to the intent their owne Receipts bee saythfullie answered, the Diseased relieved, and the People eased: who by vertue of such Taxes can oft times serue themselues, not employing Doctors at all Occasions. VVhether or not such laudable Forms were necessarie in our lawlesse Arte here, any Man may judge; especially, if his Ears were filled with the daily Complaints of the People, which haue beene hither-to kept vp in

TO THE READER,

ignorance of the sinceritie and worth of such thinges; alleadging, Whatsoever Doctors ordaines some to sell, *quid pro quo*, or at least to weigh everie man by the Purle, *per justiciam distributivam*, non *commutativam*: and so are forced to cause Merchands bring home things they know neither the composition, nor dose, only for the pryce cause, which being taken without adwise, redoundeth to their owne hurt, and our dishonour that are of the Arte; having insteade of a Common-weale, a Common-evill therein, and the whole Facultie made in evill odour to the people: not that they have ever lacked learned Professors, but because hitherto in all the North part of this Kingdome, there hath beene no well-ordered Apothecarie Shop: a thing so admirable, that it merites a part in the Records of the Realme.

True it is, that for redressing these Enormities, I have brought Home, with great Charges, fresh Materials, and an excellent Artificer, to make all things contained in this Table: more saythfullie and delicatelie to anie Mans Eye, and as cheape as they can bee had out of FRANCE, FLANDERS, or LONDON. And now seeing wee have replenished the Shop with Simples and Compositions for a yeare, being oft required for a Copie of our Taxe-Board; for eschewing such frequent copying, wee have thought expedient to cause Print all, for the vse of the Countrie People, to whome chieflie wee consecrate our Labours, and expects therefore thanks, *nomine publico*, and approbation of the wysest sort: (whom wee request to signifie vnto vs, by Word or Writ, of their Contentment) which will encourage vs to proceede to greater things, & make Voyages our selues to other Countreyes, for choosing, and Home-bringing in great, of the best Drogs (not relying, as others, which never crossed the Seas, vpon the Factors recommendation) also to renew everie yeare this Taxe, yea, they may expect of this same AUTHOR a more profitable Worke for the Countrie.

Other-wayses, if Spirites of Contradiction will admit no Reformation, but living ever by evill example, would tyrannize more softly, and gainstand Rules whereby they might bee redacted in Order, suppressing *malis Artibus*, such things vn-come to light (*qui malè facit odit lucem, veritas non querit Angulos*, if by their procurements, or of whosoever that can malicioullie, as the Spyes of CANAAN, bring vp an evill report vpon the good Land, wee finde
little

little dispatch of these VVares (whereof hitherto prayſed be GOD, wee can not complaine) wee muſt lykewyſe fall backe from this Bread, to Aikhornes with them, and (as they ſay) caſt no more Pearles before Swine: thinking it ſufficient to ſhow our good meaning to the Common-wealth, in erecting ſuch profitable VVorks, and let the Blame hence-foorth lye on others, not ASSISTERS, but RESISTERS there-to: as beeing almoſte fatall vnto this N A T I O N, that publicke VVorkes ſeldome thryue, as for thinges alreadie compoſed, wee can imploye them in our particular Practiſe: and if anie loſſe bee, wee ſhall ſuſtaine it *Reipublicæ cauſa*.

And, ſeeing that wee are more cunning, now-a-dayes, to bee euill Pratlors of others, than good Doers our ſelues, if anie Picke-quarrell, in *alieno opere malè ingenioſus*, object, All thinges vſuall other-where, not to bee comprehended within this Taxe, wee confeſſe to haue retriſhed Superfluities, and thinges out of vſe; and haue with-holden ſome rare Compoſitions, ſerving to our particular Imployment, which wee cannot as yet make *juris publici*: but they are as manie heere as the Countrey may beare; yea, I feare more, a greater number to exclaime in the contrarie, of too much varietie, and more than our Fathers vſed. But they ſhall know, that our Prædeceſſors for the moſt part, in Ages paſt, were ſtrong Men in perſonage, dwelling in Hillie Countreyes, obſerving exactlie Hippocrates his Rule, *Parci in victu, eoque ſimplici & impigri ad labores*. Yea, ſomewhat in Policie barbarous, (*abſit invidia verbo*:) But this delicate declyning Age bringerh out frailer Bodies, and more diſeaſes: ſome advancing the ſame by immoderate Studies, exhausting their *humidum radicale & calidum innatum*; and elambicating their beſt Spiritus, ſo leaving no remaines, but the bitter Dregs of Humors, to make the reſt of the life anxious and vnpleaſant. But the number of ſuch are few, compared to the reſt, that by commerce with other Nations, doe not as Salomons Sayleres to *Tarſiſh*: for they leaue behinde them the Golde of Ophyr, that is, Vertue and Policie, where-with they ſhould plant their Countrey at their Returne: and bringerh Home onlie the Apes and Peacockes of thoſe Merchandes; that is, Vanities, and Forraine Vices, where-by they infect the Kingdome: Such is, Varietie

of Dishes, Curiositie of Dietes, Sawces, Confections, VVine, and Strong Drinkes, Ydle-seat, and Venerie: perverting thereby all Digestions, corrupting the Blood, and disturbing the harmonie and proportion of Humours: and consequentlie incurring worldes of new Infirmities, vnknowne to former Ages; which Evill, since it is come to such a height now, that it is easier to bee lamented, than redressed, wee thinke it not amisse, that Remedies in exquisitenesse and varietie march, *pari passu*, with Diseases.

But, to the purpose, for vnderstanding of the following Table, it is requisite to knowe, That Leaues of Herbes are measured by hand-fulles, and an hand-full is noted thus (*m.*) Flowres, by halfe-hand-fuls, which are noted (*halfe m.*) other dry Wares and Liquors are measured by weight, whereof the first is a pound, answering nearely in measure to our Scots Mutchken, and is marked so (*lib.*) our pound containeth twelue vnces: the vnce is thus noted (*vnc.*) and containeth eight dragmaes: a dragma is noted so (*drag.*) and containeth three scruples: a scruple is written so (*scrup.*) and containeth twentie graines: a graine is marked so (*gra.*) and is the least of our weights, answering to a Pepper corne: and the more that is bought of anie thing, it is the cheaper; and the lesse, the dearer: as is vsuall in all Merchandize.

The Prices are redacted to the lowest of this yeere: and as they change heere-after in other Kingdomes, whence wee haue manie Simples, so this Taxe may bee yeerelie reformed, as wee haue begun by this first: which, if it hath not preciselie hit on euerie price, at least will serue ever in time-comming, for a grosse guesse (as wee speake) of the valour of such Wares: For Merchandize may height some-what, but not often vnto the triple, and lesse to the quadruple, quintuple, &c. This is saide, for those that abusing the Peoples ignorance, vnder pretence, that Practise is rare, and they must liue by their Calling, takes sixe prices for one thing: where-as, if Mediocritie were vsed, Employments would be more frequent, and their Consciences better. And for more certaintie to the People, it were convenient that what Doctors ordaine, were given the Patientes by writ,
and

and they to collation the Ingredients and Compositions with the Taxe: so should they not bee deceived. If anie curious man of his owne accord would buy anie things of this Table, hee shall bee answered; providing alwayes hee first informe himselfe, with vs, of the vse thereof, (which advise shall cost him nothing:) and not applying them impertinentlie, bring a slander on those hee bought them from. And to that effect, howbeit wee make long Voyages, South or North, wee shall leave behind vs a sufficient person in the Shop, to answere all buyers, and informe them of the vse of the things bought: and our selues shall not faile to be present (if GOD please) at WHITSONDAY and MARTINMES COVRTS, preciselie.

To those Simples which eyther Herballes, Gardiners, or Dictionaries could furnish vs, wee have put to first the *English*, and then the *Scottish* names: although barbarous, at least to make them knowne vnto everie man: To the intent, that if anie of those bee cast by-handes, in Families, or rot over-yeere in Gardens, send them to vs, they shall be contented for the same. As for Compositions, fewe of them have Vulgare Names, but the Title before them: and the Table of the Simples declare where-of, and how, they are made.

If anie of the People finde our Medicamentes too deare, wee are not malecontented, that they goe to others, (having not-with-standing first essayed, if anie Deduction may be made) providing they bee eased, which is the chiefe thing we aime at. If, on the other parte, anie of our Brethren will not accord to our prices, come to vs, they shall not bee refused. *Rex IVPITER omnibus idem, Fata viam inuenient.*

And lastlie, as for those that out of their ridiculous humour jested moſte at our PROGRAME, whether at ALCHIMIE or REMEDIES, when they are convinced with multitudes of Exemples, which they shall heare of (GOD willing) to their confusion, ere it bee long: Advise them, whether their Malice or Ignorance was greater, to take exceptions at our Age and remaining place, and argument so wittilie, saying, Such things wee never saw, nor knew: *Ergo*, they are impossible, *quasi verum*; as if there might not bigg Volumes bee composed of things

things which they never yet saw nor know, how loftie so ever their carriage bee. And thus wee are forced, in stead of short PREFACES, to mixe Apologeticall Digressions: rather to prick some emptie Bladders, puffed vp with the VVynde of Conceit, and to cloze the Mouthes of those Braine-sicke Raylers, who suffer no Action to escape their miss-constructing Commentaries; than other-ways to humour these our Domesticke Chamæleons, who feede vpon the Aire of ydle Discourses. Which Prolixitie, notwithstanding, and Freedome in Arguing, hoping thou wilt take in good part, I bid thee heartilie Farewell.

LECTORI PHILIATRO S.

EN Tibi (Lector Benevole) Tabellam Taxamq; Medicamentorum vsualium, in summa Capita & Classes digestorum, Methodo (quod sciam) in omnibus à nemine hætenus tentata; adeò tamen perspicua & breui quam rerum intricata varietas, & nostrorum negotiorum multiplicium importunitas fieri patiebantur. Complexi sumus eodem Catalogo eademque officina totam materiam Medicam; simplicita nempe seplasiatorum, compositiones antiquas dogmaticorum & spagyricas chymicorum; quæ non solum tres diversas pharmacopolarum officinas alibi terrarum constituant; sed compositorum discrimina, medicorum modernorum animos in duarum sectarum diversa studia & penè contraria sæpenumerò discindunt. Si nostrum esset inter hos tantas componere lites, vnica distinctiuncula determinarem, vtriusque sectæ materiam esse eandem planè, modum vero componendi dogmaticorum rudiores, reservatis facibus, sed adjectis quæ noxas corrigant, tutius tamen (vt ipsis videtur) sua pharmaca operantur in morbis recentibus, suntq; ob vilitatem pauperibus communicabilia: spagyricorum vero subtiliorem multò, detractis simplicium terrestritatibus & qualitatibus veneficis; ac proinde existimant essentias suas depuratas in nauseabundis ob molem exiguan iucundius assumi, altiusq; penetrando ad partem affectam, potentiùs certiusque operari, præsertim in robustis & morbis inveteratis, diutiusque in corrupta servari, sed ob pretium, magnatibus aut paulò ditioribus vt plurimum tantum convenire. Nos tamen in nullius magistri verba exclusivè iuraturi, ex utrisque præstantiora excerpimus, incertis, inutilibus, periculis, consultò omisiss. Si tibi vel cuivis iudicioso nostra diligentia probetur, intentum habemus, imo plus quam sperare ausim: sui criticorum nostri seculi

vel

vel potius ignavissimorum ultra suam crepidam ridiculè garrientium censo-
 riam virgulam effugere nequimus, Cerebella ista Helleborosa Caesaris ira aut
 iusta refutatione non dignamur, per nos licebit unicuique suo sensu abun-
 dare & super acumen acus; si ita lubet, calumnias exstruere, modò conceda-
 tur res nostras nostro more ordinare, & in hac statione collocato talentum
 commissam excolere, id est, Herculeo anso Augia stabulum artis istius
 repurgare, distorta dirigere, scabrosa complanare, lacunas replere, & repa-
 rare vallum, ac spectis popularibus auris quamvis cum famæ periculo, &
 apud imperitos, manifesto dispendio, agris, patriaq; cui secundum DEVM
 plurimum debeo quomodocunq; prodesse. Equidem (ne iudicando de nostro
 genio quisquis es decipiare) is sum, vel esse capio, qui actiones ad certissi-
 mam scientia & conscientia normam dirigam, non vero ad regulam Lesbiam
 rumorum vulgarium conformem; opes privatas non ad infinitam avaritiæ
 ulnam, sed ad brevissimam naturæ Spithamam mensurem, virtutem denique
 in contemptissimo quoque venerer, seclerque; vitia in quantumvis venerando
 contemniam abominerque. Conflictandum est utique generosis ingeniis cum
 seculi solique iniquitate, in quo non ad rei veritatem, sed secundum opinio-
 nes & extimam corticem vivitur; adeo & qui aliquo conatu eximio supra
 vulgus eminere satagit, & ingratisimo beneficii genere de vniuersis mereri,
 tantum abest ut omnium suffragiis publicoq; applausu promotus, voti compor
 inclutusque evadat, aut alios iusta emulatione accendat, quin præclare satis
 secum actum crediderit modo, non sycophantarum obliquis diæteriis & lu-
 dibrio se exponat, rabularum symposiantium sinistris sermonibus materiam
 subministret, & (quæ est temporis istius calamitas) penè dixerim in scenam
 ignominia prodeat, Socordia avita in actionibus propriis, & in æstimandis
 alienis satyrico sale perfusa dicacitas, ad veram virtutem aditum omnè adeo præcluse,
 ut propè piaculum sit ex turbæ ignobilis colluvione emergere, quasi nullibi
 amplius relicta esset materia gloria. Sed hac obiter: Si ordinis rationem requi-
 ris, placuit simplicia alphabetica serie disponere, ex compositis, dogmatica
 spagiricis, interna externis, & liquida siccis pramittere. Si causeris omnia
 non usque adeo exacta, scias materiam esse laboris non exigui, & in qua
 minutula lynceos oculos effugiant, ac sicubi dormitum sit, aliquid illi condonan-
 dum est, qui primus in hac parte alius glaciem perfregerit fœtu isto quam-
 vis abortivo, id est, ad conspectum vasculorum officinae raptim fabricato: ac ut
 tandem aliquando contentere, opusculum est anniversarium, sive annua dura-
 tionis, & quottannis, si ita res postulat, renovabile, ac ut fœtus urfi, lamben-
 do reformabile. Vale.

FINIS MEDICAMENTORVM CHYMICORVM.

Advert

Advertisement for the following Drogs.

Seeing this Arte hath ever hither-to vnder-lyen the slander,
 That poore Folkes cannot bee benefited by it ; wee haue
 for their Solagement prepared some cheape Medicaments,
 which indeede worketh the same effect as those of the Rich:
 but the Ingredients are not so exactlie refined, nor the Composi-
 tions so delicate in taking, or pleasant in working, *Tales habent*
labra lactucas. Wee haue lyke-wyse framed some approved Re-
 meadies, to the most frequent Diseases of the People: who if
 they cannot endure a methodicall eradicating cure, at least, they
 shall receiue an Empericall Remead, *quasi vnum pro omnibus*, which
 wee hope shall doe their turne in a good measure, as they will
 record that pleases to essay them.

Also, wee haue provided, good store of Cordiall Waters,
 and Antidotes for the Pest, which now ravaging our Neighbour
 Kingdomes, may invade vs next: considering the maligne in-
 fluence, the vnconstancie and vnkindlinesse of the Aire, sudden
 death, and vnacustomed symptomes of Sowning, that followeth
 Diseases this yeare: but aboue all, our lewd lyues; if seruent
 Repentance, and frostie Winter, interveining, preveane not.
 GOD of His Mercie maintaine vs this Peace and Plentie, that
 wee may safely throng into the House of GOD, and breathe
 in others Faces, with-out danger.

Diverse Medicaments of the vulgare sort, made
 by occasion, which shall ever bee in readinesse, or at least
 within an hours premonition; and shalbe deli-
 uered vpo anie Letter of the vnderstanding,
 or to any Messenger capable of directions.
